## **Colrain has Trailer Parts Covered**

Colrain demonstrated why they are the truck and trailer parts specialists with some exciting new products showcased on their stand at the Brisbane Truck Show including trailer axles, air suspensions, Japanese truck parts and V.Orlandi equipment to name a few.

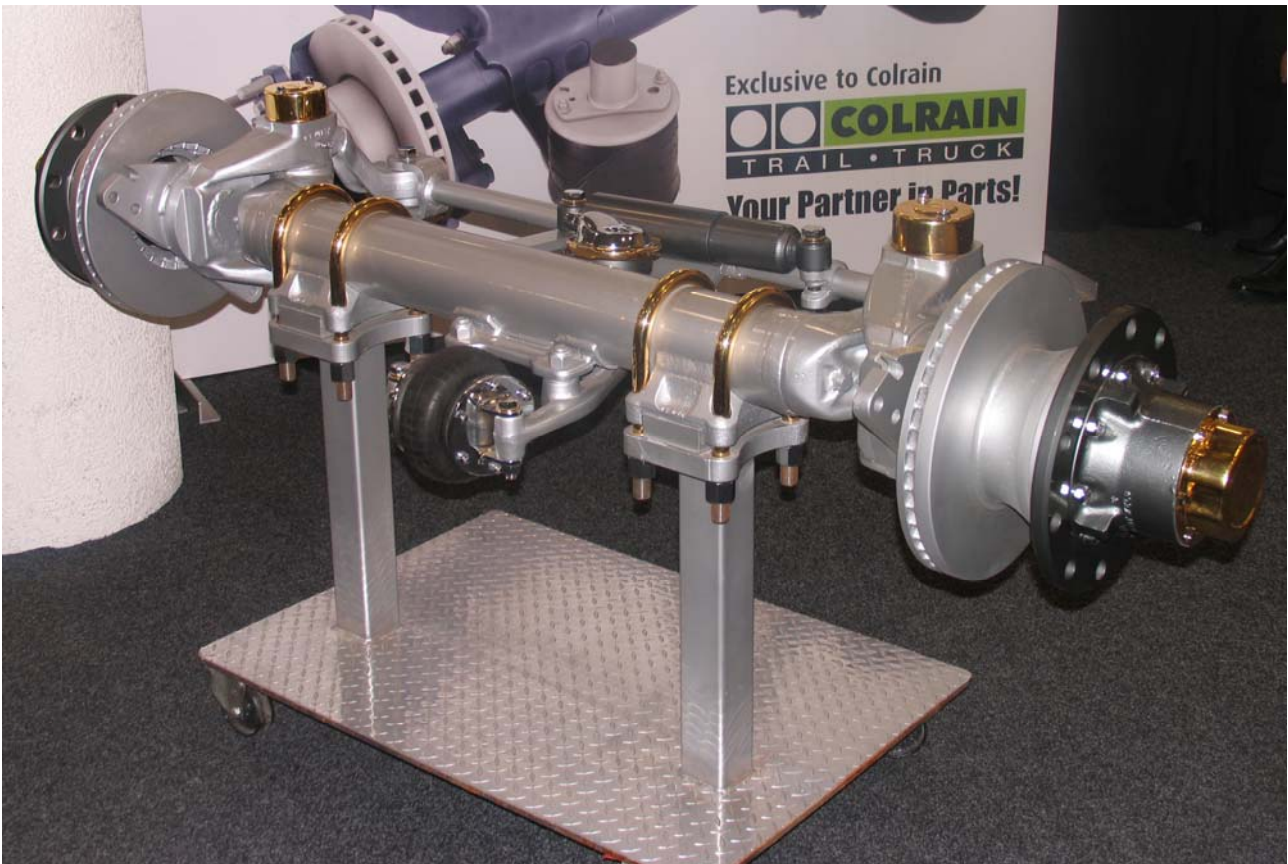

On exhibit was the Arvin Meritor CS, a low tare weight, highly durable trailer air suspension. It features cast steel trailing arms that are rigidly attached to the axle, providing a protective axle grip that extends axle life. The direct trailing arm to axle connection eliminates U-bolts, reducing maintenance and weight while increasing trailer roll stiffness. Unlike many other suspensions, the Meritor CS was designed from day one to be "road friendly" so it's damping system is highly durable and ensures low vibration transmission, resulting in longer axle and trailer life. Also on show was the Meritor self steering trailer axle system that will ultimately be available on the Meritor CS suspension.

Colrain is also very excited to have been appointed as one of the Australian distributors of the V.Orlandi range of premium towing couplings, fifth wheels and towing equipment. On exhibit were a greaseable and a greaseless top plate model of the heavy duty cast RP10 series 5<sup>th</sup> wheel. Also on display were the GE and EH series 50mm towing coupling. The EH521BTA coupling from V.Orlandi is the only coupling in Australia designed for tip over applications. All V.Orlandi products are known for having few wearing parts, saving operators time and money with maintenance and servicing.

Colrain created a lot of buyer interest with its new venture into Japanese truck parts to suit most popular makes and models of Japanese trucks.

Other products on display included Arvin Meritor's trailer steer axle and ELSA 225 lightweight disc caliper, as well as Maxus brake shoes, Maxus trailer curtains and Gaff polyurethane products.

Ends...

**Arvin Meritor's self steering trailer axle on display at the Brisbane Truck Show. It will ultimately be fitted to Meritor's new CS air suspension.**
